

Contents

Contents.....	1
1 Introduction.....	1
1.1 Our books.....	1
1.2 The software	1
2 Installing and running R and Brodgar.....	5
2.1 Brodgar	5
2.1.1 Installing Brodgar.....	5
2.1.2 Upgrade the evaluation version to a licensed version	6
2.1.3 Upgrade to a newer version.....	6
2.1.4 Hardware requirements	6
2.1.5 Running Brodgar	7
2.2 Brodgar and R.....	7
2.2.1 What is R?	7
2.2.2 Link Brodgar & R	8
2.2.3 Problems.....	9
2.3 Getting started.....	9
2.4 Dealing with graphs	10
2.4.1 R graphs	10
2.4.2 Non-R graphs	11
2.5 Microsoft VISTA problems	11
3 Import data in Brodgar.....	13
3.1 Import a data set for the first time.....	13
3.1.1. Import data from a spreadsheet	15
3.1.2 Import data from an ascii file	18
3.2 Open existing project.....	19
3.3 The “Info Y & X” tab	21
3.4 Demo data.....	23
3.5 Missing values and nominal variables	24
3.6 Problems and error messages.....	26
4 Exploration	1
4.1 Data exploration using R tools.....	1
4.1.1 Boxplots and conditional boxplots	2

4.1.2 Histograms	3
4.1.3 Dotplot	4
4.1.4 QQ-plots	5
4.1.5 Coplot	5
4.1.6 Pairs	7
4.1.7 Lattice graphs	7
4.1.8 Scatterplot	8
4.1.9 General remarks	9
4.2 General tools	9
4.2.1 Plot data	9
4.2.2 Enumerate large correlations	10
4.2.3 Diversity indices	10
4.3 Time series tools	11
4.4 Examples from Zuur et al. (2007)	18
4.4.1 Figure 21.2 in Zuur et al. (2007)	18
4.4.2 Figure 21.4 in Zuur et al. (2007)	18
4.4.3 Figure 22.3 in Zuur et al. (2007)	18
4.4.4 Figure 33.1 in Zuur et al. (2007)	19
4.4.5 Figure 16.1 in Zuur et al. (2007)	19
4.4.6 Figure 4.7 in Zuur et al. (2007)	20
4.4.7 Figure 4.8 in Zuur et al. (2007)	20
5 Univariate techniques.....	29
5.1 Linear regression in Brodgar	29
5.1.1 A simple linear regression analysis	29
5.1.2 Select response variable	31
5.1.3 Select explanatory variables and nominal variables	31
5.1.4 Use weights	32
5.1.5 Graphs settings and general settings.....	32
5.1.6 Interactions	38
5.1.7 Specialised corner	39
5.2 Regression examples from Zuur et al. (2007; 2009).....	39
5.2.1 Section 20.4 in Zuur et al. (2007).....	39
5.2.2 Section 26.4 in Zuur et al. (2007).....	40
5.2.3 Section 7.5 in Zuur et al. (2009).....	42
5.3 Generalised linear modelling in Brodgar.....	44
5.4 GLM examples from Zuur et al. (2007; 2009).....	47
5.4.1 Section 21.6 in Zuur et al. (2007).....	47
5.4.2 Section 10.3 in Zuur et al. (2009).....	48
5.4.3 Section 9.10 in Zuur et al. (2009).....	49
5.5 Generalised additive modelling in Brodgar	51
5.5.1 Selection of variables	51
5.5.2 Distribution and link function	53
5.5.3 Weights	54
5.5.4 Results	54
5.5.5 Graphs settings and settings	54

5.5.6 Changing options for the smoothers.....	55
5.5.7 Interactions.....	57
5.5.8 Specialised corner.....	59
5.6 GAM examples from Zuur et al. (2009).....	60
5.6.1 GAM with multiple smoothers.....	60
5.6.2 GAM with an offset.....	61
5.7 Regression and classification trees in Brodgar.....	62
5.8 Mixed effects modelling in Brodgar.....	64
5.8.1 The random intercept model.....	64
5.8.2 Settings.....	68
5.8.3 The random intercept and slope model.....	68
5.8.4 Specialised corner for mixed effects models.....	69
5.8.5 Mixed effects modelling example from Zuur et al. (2009).....	71
5.9 GLS to model heterogeneity.....	78
5.10 GLS example from Zuur et al. (2009).....	84
5.11 GAMM (or GLS) and auto-regressive correlation.....	87
5.12 GAMM (or GLS) and other correlation structures.....	89
5.13 GAMM and random effects.....	92
5.14 Multinomial logistic regression.....	93
